

BENEFITS OF DURABLE CRF

1. BIODEGRADABLE RESIN COATING

Environmentally friendly and sustainable, tested by the ASTM D5988

2. NO VOLATILIZATION OR LEACHING

Nutrients stay available to the plant

3. NUTRIENT RELEASE DEPENDS ON TEMPERATURE ONLY

Not on water, pH, or soil-activity

4. NO EXPONENTIAL RELEASE AT HIGH TEMPERATURES

Ensures steady nutrient supply

5. SLOW AND GENTLE START OF NUTRIENT RELEASE

Avoids plant stress or burning

6. SMALL PRILL SIZE (1–3 MM, ~48 PRILLS PER GRAM)

Better spreading and accuracy

7. DOES NOT SHRINK OR SWELL WHEN WET

Stable structure in all conditions

8. TWO-COMPONENT COATING WITH A HARD OUTER SHELL

High mechanical durability

9. LONG-LASTING EFFECT

Fewer applications needed, often just once per season

10. BALANCED NPK FORMULAS INCLUDING MG, CA, FE, AND TRACE ELEMENTS

Complete plant nutrition
